

Marine Life Adventure

Tide Pool Exploration

A staff marine life scientist will teach you the techniques of tide pooling and show you what marine creatures to look for. Tide pools are home to a variety of species: shelled creatures like opihi and cowry cling tightly to the rocks, brittle sea stars and hermit crabs scuttle away to hide, juvenile fish are safe from larger fish, and sea cucumbers and octopi are masters at camouflage. Discover something new every time you explore a tide pool! Reef shoes are required. All ages welcome.
